Let System Software 7.3
UNLEASH THE POWER OF YOUR ALLWORX SYSTEM

The NEWEST Allworx system software integrates a full suite of server and IP phone software features with some **great new functionality** in one tightly unified package to improve your communications reach.

In addition to its already comprehensive feature set, Allworx 7.3 software release offers a number of new

high-value capabilities:

NEW!

System 7.3

allworx.

Innovation to Configurable Dial Plan — allows for significantly greater dialing configuration— especially in multi-site environments.

Hot Desking — easily allows users to 'log on' to any IP phone with just your ID and PIN number. Perfect for a shared workspace environment or for a mobile workforce.

Day/Night Schedules Per Auto Attendant Greeting — configure your greetings differently day or night for different work hour schedules in each department.

Speed Dial Enhancements — with the touch of a single button, dialing to outside services requiring unique digits like conference bridges, banks or pharmacies is easier, because additional digits will be additionally dialed out.

Visual Message Center Display — navigate voicemails through the LCD phone screen.

Expanded Park Orbits — now calls can be parked and retrieved from any location in a multi-site environment.

Advanced Multi-site Paging — your page announcements are delivered anywhere where they need to be heard including page zones to or from other sites.

Call Assistant — greater visibility of hot desked users and call queues enhances incoming call processing and management capabilities.

ACD & Call Queuing Enhancements — more robust intelligent routing of our incoming queue calls to agents.

Configurable Voicemail Message Length — maximize the length of messages up to 15 minutes.
